PROFESSIONAL SUMMARY

Senior full-stack engineer with extensive production experience in Node.js, TypeScript, and PHP — delivering multi-tenant SaaS platforms, distributed event-driven systems, and AI-integrated backends. Owns full engineering lifecycle end-to-end — from MySQL schema and PHP/Codelgniter backends to React frontends, cloud infrastructure, and CI/CD pipelines — consistently as primary or sole engineer accountable for outcomes. AI-native workflow with Claude Code, GitHub Copilot, Gemini, and ChatGPT embedded in daily delivery; React 18, Clean Code, and Ultimate Design Patterns certified.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Node.js, Golang, Python, C#

Frontend: React.js, Next.js, Bootstrap, Tailwind CSS

Backend Frameworks: Fastify, Laravel, Symfony, ASP.NET/Core, Codelgniter

Databases: PostgreSQL, MySQL, MongoDB, Redis, MSSQL Server, SQLite · Typesense, Solr

ORM / Queue: Drizzle, Doctrine, NHibernate, Entity Framework · NATS JetStream, RabbitMQ

Cloud & DevOps: AWS Lambda, API Gateway, S3, ECS, EC2, SQS, EventBridge, CloudWatch · Docker, CI/CD, Git · Railway, Vercel, Supabase, Linode, Azure

APIs & Auth: PlacePay, PayPal, Stripe, Twilio, Google API, FusionAuth, Better Auth, OAuth, JWT, Nexmo, Asterisk

Testing: Jest, Vitest, Playwright, PHPUnit

AI Productivity: Claude Code (Anthropic), ChatGPT (OpenAI), GitHub Copilot, Gemini

Tools: JIRA, ClickUp, Confluence, GitHub, GitLab, Bitbucket · Scrum/Agile

Certifications: React 18 · Clean Code · Ultimate Design Patterns

EXPERIENCE

Jun 2025 – Present · Contract Software Engineer (Remote)

Node.js, TypeScript, PostgreSQL, NATS JetStream, Redis, Typesense, FusionAuth, Docker, Railway, React, Supabase, Vercel, Azure, Stripe, Vitest, Playwright

- Architected multi-tenant SaaS backend with per-tenant data isolation, JWT RBAC, and NATS JetStream event pipeline.
- Built AI parts recommendation engine consuming speech-to-text events for real-time inventory suggestions and dispatch optimization.
- Delivered production security layer for healthcare CFO SaaS — audit logs, encrypted OAuth storage, and rate-limited MFA endpoints.
- Engineered project management SaaS end-to-end — drag-and-drop scheduling, row-level security, and CI/CD from Figma to Azure.

Jul 2020 – Apr 2025 · Software Engineer · Concierge Plus, Canada

TypeScript, Node.js, PHP, MySQL, AWS Lambda, API Gateway, S3, ECS, SQS, EventBridge, CloudWatch, Docker

- Built Node.js/TypeScript data integration system on AWS Lambda syncing resident records across 75,000+ building units.
- Integrated PlacePay for resident payment processing — manual payments, bulk autopay enrollment, and lifecycle unenrollment on tenant vacate.

- Migrated synchronous property sync pipeline to event-driven Lambda/SQS model — isolated per-tenant failures and eliminated batch blocking.
- Operated production AWS serverless and container infrastructure across Lambda, ECS, SQS, EventBridge, and CloudWatch.

Dec 2015 – Feb 2020 · Software Engineer · TruEnergy Services, USA

Node.js, PHP, Golang, Twilio, Solr, MySQL, Socket.IO

- Built browser-based call and SMS platform for truck drivers via Twilio, Node.js, and Socket.IO across multiple trucking companies.
- Integrated vTiger CRM for invoicing, settlement management, and ESI/Meter ID contract validation via Excel parsing pipelines.
- Optimized voice recording search with Solr — reduced query response time from several minutes to under a second.
- Developed Golang file service with JWT authentication for secure CRM-to-web-app document integration.

Sep 2013 – Dec 2015 · Software Engineer · Multi-client Outsourced Projects

ASP.NET, PHP, Symfony, MySQL, MSSQL Server

- Delivered XBRL financial web apps, invoice split tools, and contractor registration platforms across multiple clients.
- Built membership management systems using ASP.NET MVC, Symfony2, Entity Framework, and Doctrine2.

EARLIER EXPERIENCE

Software Engineer / Systems Architect · C#, ASP.NET, PHP — savings and loan management, SMS top-up gateway, billing, AR/AP, inventory, and HR information systems across financial and enterprise clients.

EDUCATION & CERTIFICATIONS

Computer Engineering — Liceo de Cagayan University, Philippines

Certifications: React 18 · Clean Code · Ultimate Design Patterns

Languages: English (*professional*), Tagalog, Cebuano
