PROFESSIONAL SUMMARY

AI-native senior full-stack engineer with deep production experience in Node.js, TypeScript, and PHP, specializing in multi-tenant SaaS, AI-integrated backend systems, and distributed event-driven platforms. Delivers end-to-end production systems — multi-tenant data isolation, enterprise RBAC, event-driven messaging, AI-powered engines, and cloud-native APIs across U.S. client engagements. Certified React 18, Clean Code, and Ultimate Design Patterns practitioner with Claude Code (Anthropic), ChatGPT (OpenAI), GitHub Copilot, and Gemini embedded in the daily development workflow.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Node.js, PHP, C#, Golang, Python

Frontend: React.js, Next.js, Tailwind CSS

Backend: Fastify, Laravel, Symfony, ASP.NET/Core

Databases: PostgreSQL, MySQL, MongoDB, Redis, MSSQL Server, SQLite, Typesense, Solr

ORM / Queue: Drizzle, Doctrine, NHibernate, Entity Framework, NATS JetStream, RabbitMQ

Cloud & DevOps: AWS (Lambda, API Gateway, S3, ECS, EC2, SQS, EventBridge, CloudWatch), Railway, Vercel, Supabase, Azure, Docker, CI/CD, Git

APIs & Auth: Stripe, PayPal, Twilio, Google API, FusionAuth, Better Auth, OAuth, JWT, PlacePay

Testing: Vitest, Playwright, Jest, PHPUnit

AI Productivity: Claude Code (Anthropic), ChatGPT (OpenAI), GitHub Copilot, Gemini

Certifications: React 18 · Clean Code · Ultimate Design Patterns

EXPERIENCE

Jun 2025 – Present · Contract Software Engineer · Remote

Node.js, TypeScript, PostgreSQL, React, NATS JetStream, Redis, FusionAuth, Drizzle, Stripe, Supabase, Docker, Vitest, Playwright

- Architected multi-tenant SaaS core with per-tenant data isolation, subdomain routing, and RBAC across all service layers
- Built AI-powered parts recommendation engine consuming voice transcription events for real-time inventory suggestions
- Deployed NATS JetStream pub/sub backbone keeping search indexes, mobile clients, and notifications in sync
- Delivered end-to-end service order lifecycle API: intake, dispatch, diagnosis, procurement, authorization, invoicing
- Sole engineer delivering full-stack SaaS from Figma designs to production on React and PostgreSQL
- Engineered multi-tenant row-level security with RBAC triggers, approval chains, and referential integrity on deletion
- Built drag-and-drop scheduling across Day/Week/Month views backed by PostgreSQL date-range query functions
- Delivered budget performance module with real-time cost tracking, schedule variance, and budget forecasting
- Built peer benchmarking engine ranking healthcare practices against industry cohort percentiles across 10+ metrics

- Delivered automated payment recovery pipeline with multi-stage escalating reminders and Stripe invoice history
 - Engineered compliance audit log, encrypted OAuth credential storage, and rate limiting on all auth endpoints
 - Built marketing trend history — weekly ad-platform snapshots with KPI summaries and spend-vs-revenue charting
-

Jul 2020 – Apr 2025 · Software Engineer · Concierge Plus, Canada

TypeScript, Node.js, PHP, AWS (Lambda, API Gateway, ECS, SQS, EventBridge, S3, CloudWatch), MySQL, Docker

- Built Node.js/TypeScript data integration syncing resident records across 75K+ building units in a multi-tenant SaaS
 - Operated production AWS serverless and container infrastructure across decoupled event pipelines and document storage
 - Integrated PlacePay for recurring, bulk, and manual payments with amenity booking and ledger transactions
-

Dec 2015 – Feb 2020 · Software Engineer · TruEnergy Services, Dallas TX, USA

Node.js, PHP, Golang, Twilio, Solr, MySQL

- Built browser-based call and SMS platform for truck drivers across multiple companies via Twilio and Socket.IO
 - Optimized voice recording search with Solr, reducing query time from minutes to seconds across a large dataset
 - Developed Golang file service with JWT authentication for secure CRM-to-web-app integration
 - Integrated vTiger CRM for invoicing and settlement; built Excel parsing pipelines for ESI contract validation
-

Sep 2013 – Dec 2015 · Software Engineer · Multi-client Outsourced Projects

ASP.NET, PHP, Symfony, MySQL, MSSQL

- Delivered XBRL financial web apps, contractor registration platforms, and membership management systems across multiple clients

EARLIER EXPERIENCE

Software Engineer / Systems Architect — savings and loan management, SMS top-up gateway, billing, AR/AP, inventory, and HR systems across financial and enterprise clients using C#, ASP.NET, PHP

EDUCATION & PERSONAL

Computer Engineering — Liceo de Cagayan University, Philippines
