PROFESSIONAL SUMMARY

AI-native senior full-stack engineer with deep production experience in Node.js, TypeScript, and PHP, specializing in multi-tenant SaaS, AI-integrated backend systems, and distributed event-driven platforms. Delivers production systems end-to-end — multi-tenant data isolation, enterprise RBAC, event-driven messaging pipelines, AI-powered engines, and mobile backend APIs across cloud-native environments. Certified React 18, Clean Code, and Ultimate Design Patterns practitioner with Claude Code (Anthropic), ChatGPT (OpenAI), GitHub Copilot, and Gemini embedded in the daily development workflow.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Node.js, PHP, C#, Golang, Python

Frontend: React.js, Next.js, Tailwind CSS

Backend: Laravel, Symfony, Fastify, ASP.NET/Core

Cloud & DevOps: AWS (Lambda, API Gateway, S3, ECS, EC2, SQS, EventBridge, CloudWatch), Railway, Vercel, Supabase, Linode, Azure, Docker, CI/CD, Git

Databases: PostgreSQL, MySQL, MongoDB, Redis, MSSQL Server, SQLite, Elasticsearch, Typesense, Solr

Testing: Jest, Vitest, Playwright, PHPUnit

APIs & Auth: Stripe, PayPal, Twilio, Google API, Better Auth, FusionAuth, OAuth, JWT

Tools: JIRA, ClickUp, Confluence, GitHub, GitLab, Bitbucket, Scrum/Agile

AI Productivity: Claude Code (Anthropic), ChatGPT (OpenAI), GitHub Copilot, Gemini

Certifications: React 18 · Clean Code · Ultimate Design Patterns

EXPERIENCE

Jun 2025 – Present · Contract Software Engineer · Remote

Node.js, TypeScript, PostgreSQL, NATS JetStream, Redis, Typesense, FusionAuth, React, Supabase, Anthropic Claude API, Docker, Railway, Azure

- Architected production multi-tenant SaaS core — per-tenant data isolation, subdomain routing, and RBAC enforced across all microservices.
- Built AI-powered parts recommendation engine consuming voice transcription events for real-time inventory suggestions and dispatch optimization.
- Engineered generative AI backend for Claude-powered CFO advisory SaaS — SSE streaming, plan-tier rate limiting, and peer cohort benchmarking.
- Delivered end-to-end project management SaaS — multi-tenant row-level security, React drag-and-drop scheduling, and EVM budget module.

Jul 2020 – Apr 2025 · Software Engineer · Concierge Plus, Canada

TypeScript, Node.js, PHP, MySQL, AWS Lambda, API Gateway, S3, ECS, EC2, SQS, EventBridge, CloudWatch, Docker

- Built Node.js/TypeScript data integration system syncing resident records across 75K+ building units in a multi-tenant SaaS.
- Operated production AWS serverless infrastructure — Lambda, ECS, SQS, EventBridge, S3, and CloudWatch across decoupled event pipelines.

- Integrated PlacePay API for recurring, bulk, and manual payment processing with amenity booking and ledger transactions across multi-tenant accounts.

Dec 2015 – Feb 2020 · Software Engineer · TruEnergy Services, Dallas TX, USA

Node.js, PHP, Golang, Twilio, Solr, MySQL

- Built browser-based call and SMS communication for truck drivers across multiple trucking companies via Twilio and Socket.IO.
- Integrated vTiger CRM for invoicing and settlement; built Excel parsing pipelines for supplier data and ESI contract validation.
- Developed Golang file service with JWT authentication for secure CRM-to-web-app integration.
- Optimized voice recording search via Solr, reducing query response time from minutes to seconds across a large driver dataset.

Sep 2013 – Dec 2015 · Software Engineer · Multi-client Outsourced Projects

ASP.NET, PHP, Symfony, MySQL, MSSQL

- Delivered XBRL financial web apps, invoice split tools, contractor registration platforms, and membership management systems across multiple clients.

EARLIER EXPERIENCE

Software Engineer / Systems Architect · C#, ASP.NET, PHP — savings and loan management, SMS top-up gateway, billing, AR/AP, inventory, and HR information systems across financial and enterprise clients.

EDUCATION & PERSONAL

Computer Engineering — Liceo de Cagayan University, Philippines

Languages: English (*professional*), Tagalog, Cebuano
